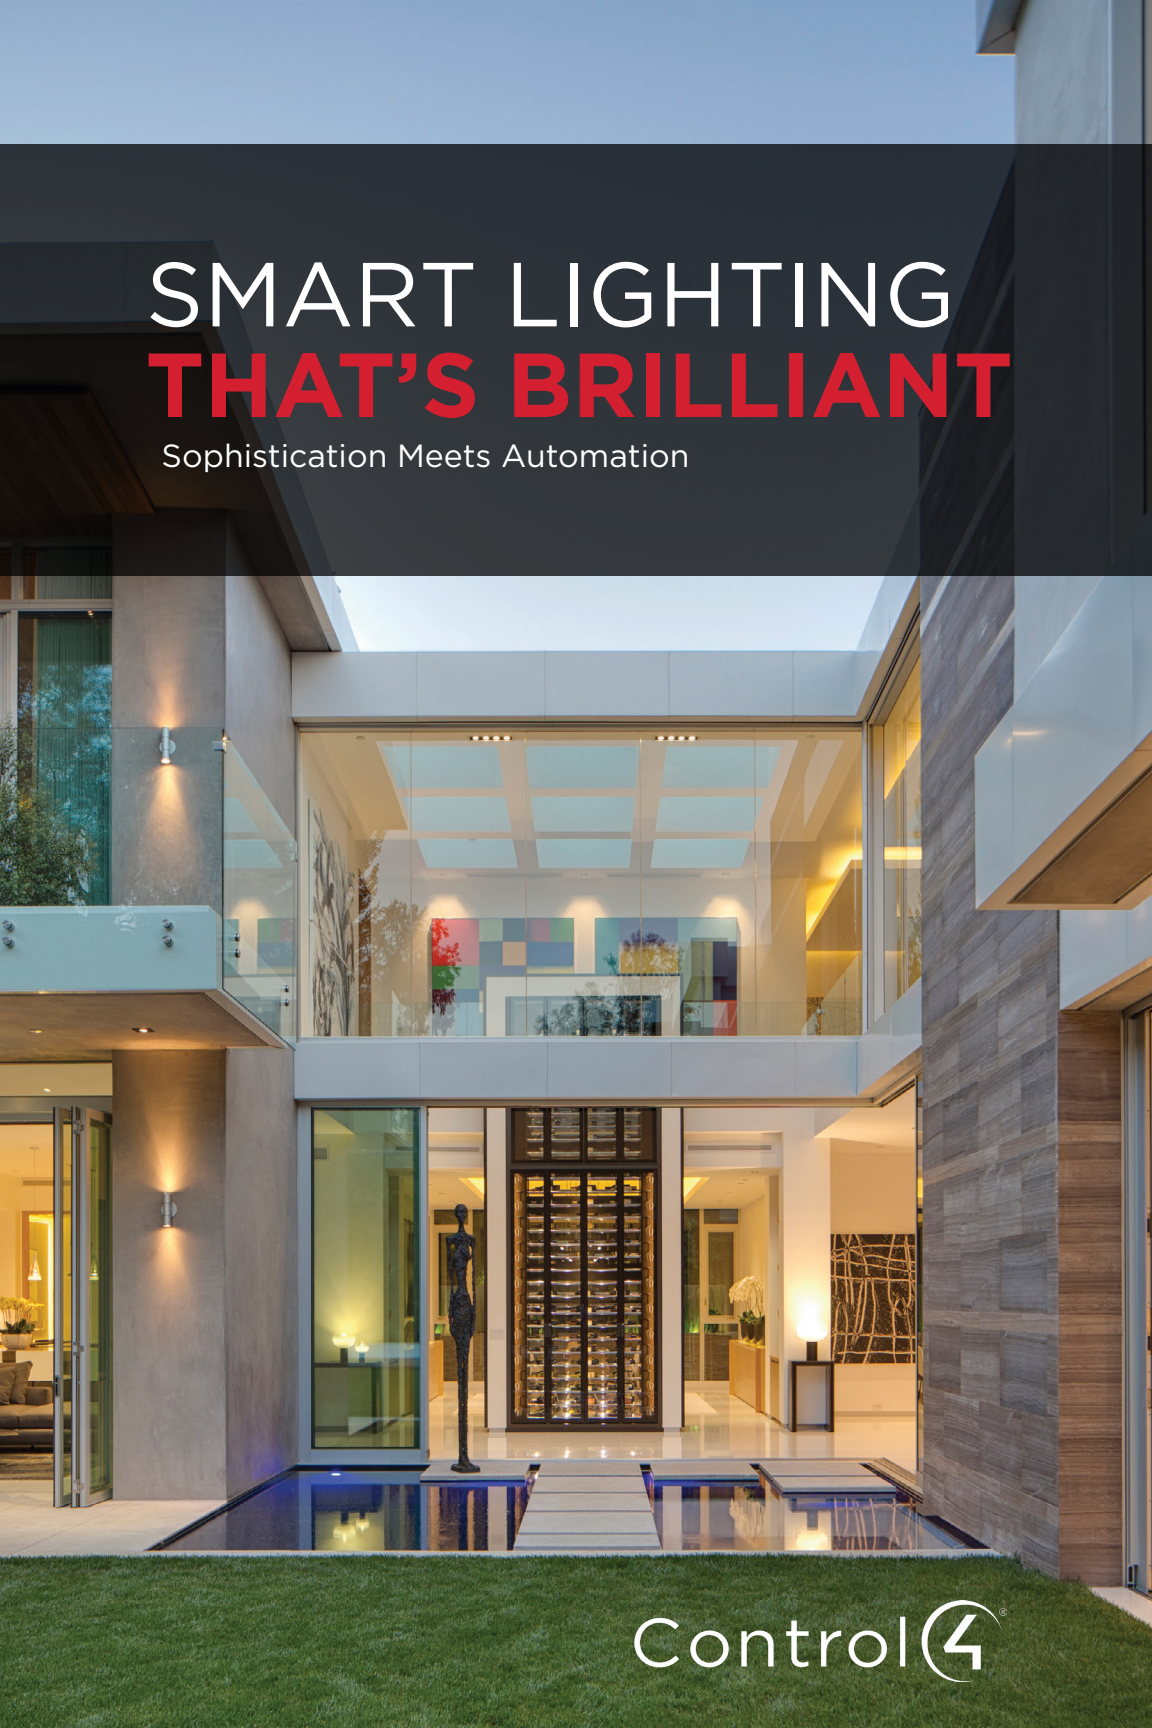
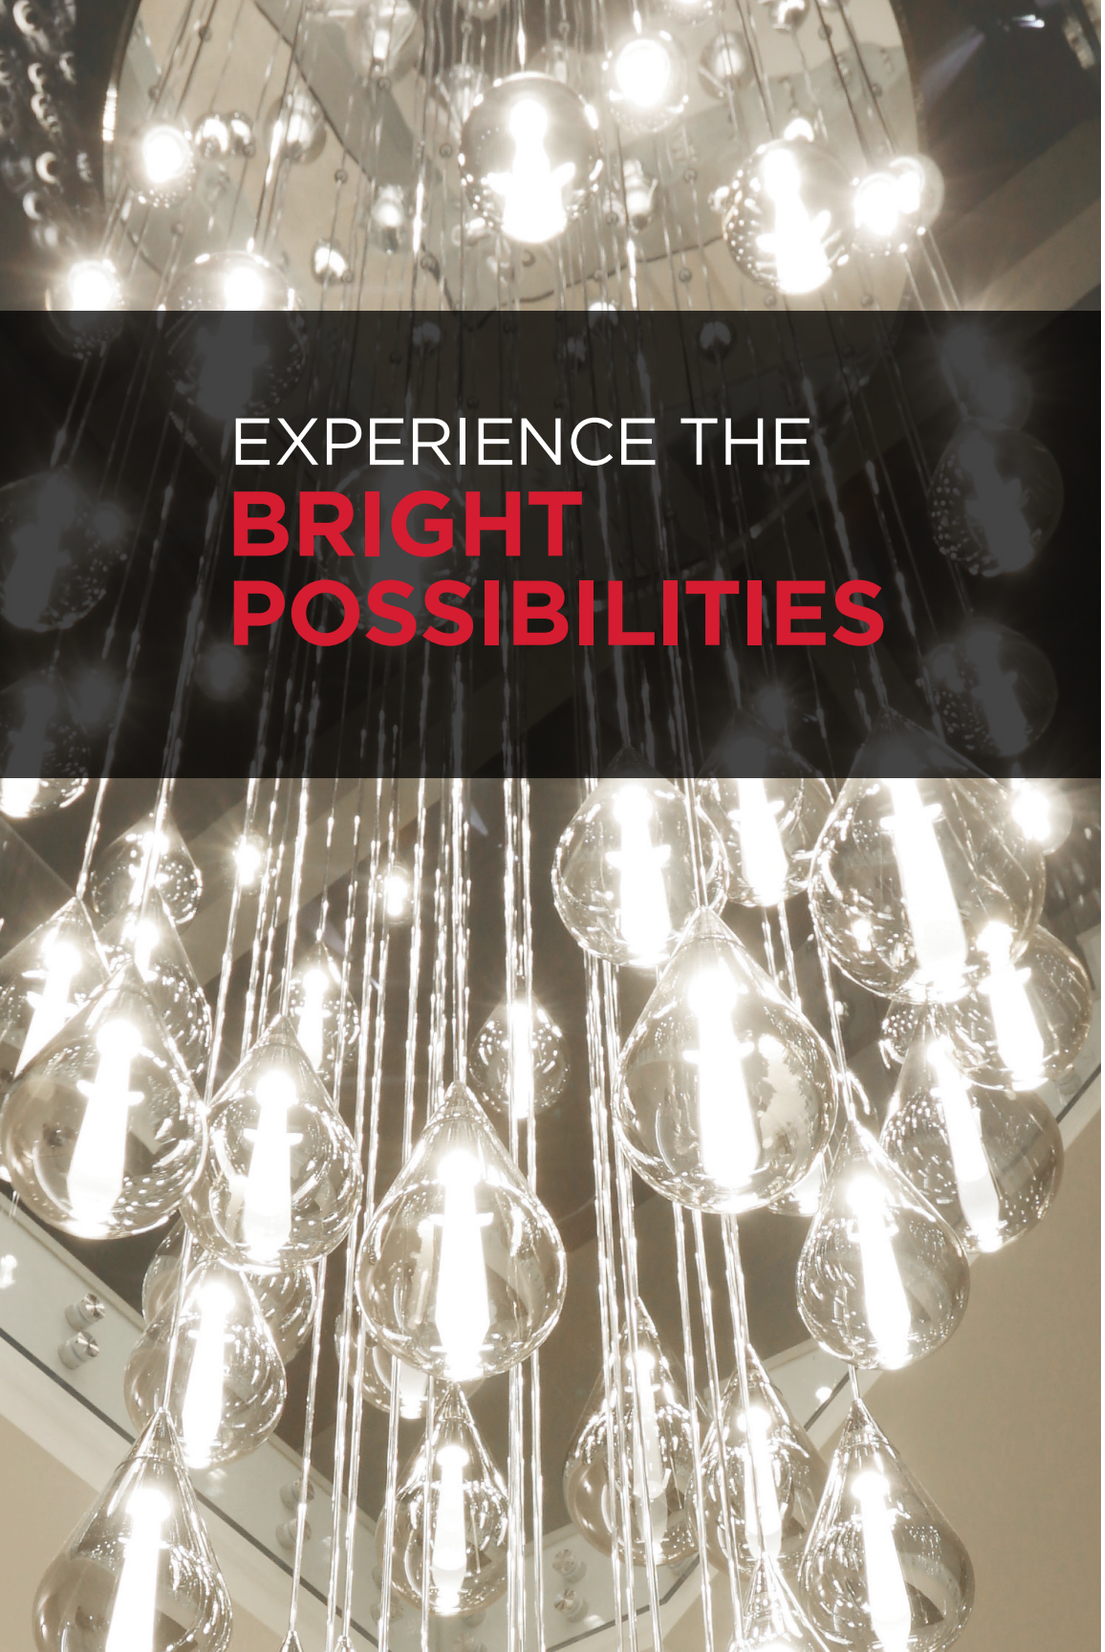
# SMART LIGHTING THAT'S BRILLIANT

Sophistication Meets Automation



Control4®



# EXPERIENCE THE **BRIGHT POSSIBILITIES**

Smart lighting will subtly, but effectively, influence the ambiance of a home, complementing the aesthetics of its décor, while also providing convenience and energy efficiency.

Brighten or dim any light in the room—or the entire house—with a single touch. Or automate lighting to respond to your life, without any touch at all. The house can even appear occupied when no one is home.

It's not just smart, it's brilliant.

*The benefits of smart lighting aren't limited to new homes and construction projects. Even dwellings that are centuries old can be automated with the brilliance of Control4.*

# PERSONALIZE YOUR LIGHTING

## Go Ahead—Make a “Scene”

How Control4 Smart Lighting is controlled—or how a mood is set in each room—is as unique and personal as the home itself and the people who live in it.

Plus, when smart lighting is tied to other systems in the home—such as the music, shades, temperature, security and more—the possibilities are virtually endless. Your Control4 dealer will help determine the best way to tailor smart lighting to your life.

- A “Cooking” scene starts a playlist and brings the kitchen lights up while dinner is being prepared.
- A “Goodnight” button turns off all lights, locks the doors, arms the security system and turns the thermostat back to a desired setting.
- Lights in the house turn on automatically as the garage opens, offering a safe welcome home.
- Motion sensors provide hands-free illumination, marking a pathway to the bathroom or kitchen in the evening.
- A tap on a Control4 touch screen or smartphone turns off the lights in the theater and starts the movie.
- From under the roof to under the stars, smart lighting can light up the deck and emphasize water features in the back yard.

*Centralized Lighting allows for dimming, switching and load management to be performed by modules that are tucked away in a closet, to avoid disrupting the aesthetics of a home with lots of keypads.*

# BEAUTY AND INTELLIGENCE

## Insightful Interaction

Control4 keypads provide a stunning interface for any Control4 Smart Home, combining flexible button configurations with beautiful colors and finishes.

- Customizable, backlit engraved buttons allow for quick control of favorite scenes.
- Buttons can be configured using five different button sizes for a total of 38 possible configurations and can be reconfigured whenever a change is needed or desired.
- LEDs provide quick visibility to which lights or scenes are currently activated.
- The bottom button can be designated as up and down volume controls.
- Mix-and-match engraved buttons with sleek, screwless faceplates in 14 stylish colors and finishes.
- Available in 120V, 240V or 277V.

*With configurable, custom engraved buttons, everyone will know what each button does. Built-in sensors change the button brightness depending on the lighting of the room, so they're always perfectly lit.*

# MORE THAN
# JUST A LIGHT SWITCH

## You'll Want to Push These Buttons

Sure, a Control4 keypad can manage all of the lights in the house, but it also doesn't have to be tied to a single light at all. Buttons can be programmed to handle virtually any non-lighting task, as well.

- Fire up a movie or your favorite Netflix® show.
- Lock and unlock the front door.
- Start or stop the sprinklers.
- Open and/or close the garage door.
- Arm or disarm the alarm.
- Start or stop your music and control the volume.

Never before have you had this type of convenience right from the "light switch" on your wall.

*It's also easy to brighten or dim any light in the room—or entire house—right from a Control4 touch screen.*

# ELEGANT AND EFFICIENT

## See the Light, Save the Green

Control4 Smart Lighting is both beautiful and energy efficient.

- Lights can be programmed to turn on when you enter a room and back off again when you've left.
- Outdoor lights automatically turn off before the sun comes up and back on again as the sun goes down.
- A "Goodbye" button lowers the shades, adjusts the heat and turns off the lights.
- Lighting can be programmed to operate in unison with the shades and thermostats to save money on the energy bill.

*Control4 dealers are experts with countless ideas to help create uniquely personal smart lighting experiences in any home.*

# ADDED SAFETY & SECURITY

## Peace of Mind is a Bright Idea

Control4 Smart Lighting is sophisticated enough to enhance safety and security within the home.

- While away, lights and shades—and even televisions—can activate in a random fashion so it appears that someone is home.
- Motion sensors can be programmed to turn lights on—inside or outside of the home—if movement is detected, and then send you an alert when the sensor in that area is triggered.
- Lights in the home can flash on and off repeatedly when the security alarm is triggered, drawing more attention to a security breach.

*With the Control4 App, an "Away" scene can be activated that alternates lights at home so it appears occupied.*

# Contemporary Style Wireless Lighting Controls

**Control4® Adaptive Phase Dimmer**

Compatible with virtually any load type. Supports both forward and reverse phase dimming. Available in 120V, 240V and 277V versions. Also available in square format for UK and Euro markets.

**Control4® Forward Phase Dimmer**

An economical solution for dimming forward phase loads. Available in 120V only.

**Control4® 0-10V Dimmer**

Provides in-wall control of 4-wire 0-10V dimmable fluorescent ballasts and LEDs. Available in 120/277V and 240V versions.

**Control4® Switch**

On/off control of a variety of load types. Supports high in-rush loads like fountain pumps or banks of fluorescent lights. Available in 120V, 240V and 277V versions. Also available in square format for UK and Euro markets.

**Control4® Configurable Keypad**

Provides elegant control of lighting scenes, blinds, music and more. An assortment of buttons are included and can be arranged in up to 38 different configurations. Available in 120V, 240V and 277V versions. Also available in square format for UK and Euro markets.

**Control4® Keypad Dimmer**

Combines dimming capabilities of the Adaptive Phase Dimmer with the customization of a Configurable Keypad. Available in 120V, 240V and 277V versions.

**Control4® Fan Speed Controller**

Provides quiet fan speed control of standard paddle-type ceiling fans. Available in 120V only.

**Control4® Auxiliary Keypad**

An economical solution for 3-way load control. Connects directly to compatible Control4® Dimmers, Switches, or Fan Speed Controllers with existing, in-wall wiring. Available in 120/277V versions.

**Status LEDs**

Provides visual status of scenes or devices. RGB LEDs can be changed to virtually any color.

**Backlit buttons**

Illuminates engraving for easy viewing. RGB backlighting allows virtually any color to light up each button.

**Custom engraving**

Clearly identifies each button so you know what you're controlling before you touch it.

Keycaps can be engraved in up to 130 different languages, including English, Spanish, German and Chinese.

**Ambient Light Sensor**

Automatically adjusts backlight and status LED brightness depending on the light level of the room.
